Summary

Helping B2B companies tell what makes their product different, and empowering thousands of product marketers to tell theirs through the PMMiya community, with high-value content such as podcasts and events.

Professional Experience

Demostack, Tel Aviv, March 2026 to August 2026
Founding Product Marketing Manager

- Improved adoption and sentiment among Demostack's power users, sales and marketing teams from cybersecurity companies, with deliverables directly addressing their acute pain.
- Fully owned the launch of the company's agentic offering (enablement agents and MCP) from ideation through go-live and adoption, covering positioning, naming, value-driven messaging, competitor differentiation, collateral, customer validation, website content, PR, field training and announcement comms. The launch set Demostack apart in a crowded ecosystem.
- Proactively engaged with customers and prospects (F2F, Zoom, Gong) to extract unknown use cases and needs that shaped the roadmap and narrative, and to create public-facing proofs such as case studies, testimonials and G2 reviews.
- Reduced dependency on busy teams (design, PM) by building AI workflows to automate long-standing bottlenecks such as sales slides, UI mockups, one-pagers and testimonials, equipping account executives with self-serve generation capabilities that ensure consistency with the current story.
- Drove pipeline and brand exposure across multiple go-to-market motions, such as:
    - Community- and partner-led collaborations with influencers relevant to our ICP, including the organization of a vibe coding hackathon that generated 3 enterprise SQLs.
    - Organic and paid campaigns based on product marketing content.

PMMiya Community, Tel Aviv, February 2026 to present

- Host a series of live stream events on how to champion **product marketing in cybersecurity** with PMM leaders from the security ecosystem. Recent guest includes Eyal Webber-Zvik from Cato Networks.
- **Manage** Israel's largest product marketing community, delivering high-quality content in the form of meetups, podcasts and webinars packed with practical, ready-to-apply GTM insights.

Windward Maritime AI, Tel Aviv, May 2023 to May 2025
Product Marketing Manager

- Owned the positioning and messaging of the company's AI story, contributing to its acquisition in 2025.
- Launched 3 technical products, translating complex features into solutions with clear, marketable value for target buyers.
- Served as the go-to subject matter expert on both domain and platform topics, training customer-facing teams, guiding strategic initiatives across the organization and speaking in public forums such as webinars, briefings and trade conferences.
- Led the go-to-market strategy and execution, from identifying audiences, use cases and USPs to upskilling the business unit and deploying the marketing plan, with a data-driven focus on measurable outcomes and KPIs.
- Enabled sales and CS with battlecards, objection handling, discovery guides, one-pagers, pitch slides, competitive analyses, FAQs and RFP responses.
- Developed user-facing content—including tutorials, feature announcements and demo videos—focused

on clarity, simplicity and practical use.
- Wrote product marketing copy tailored to enterprise buying cycles, aligning assets like landing pages, case studies and whitepapers to the right personas to drive prospect progression through the funnel.
- Represented the voice of the market, talking to clients and prospects directly, tracking competitors and turning those insights into narrative, campaign and roadmap decisions.

CELLEBRITE (NASDAQ: CLBT), PETAH TIKVA, DECEMBER 2021 TO APRIL 2023
SENIOR MANAGER, PRODUCT MARKETING
- Led the category shift from offensive cybersecurity to digital intelligence, owning positioning, the competitive narrative and GTM materials for security, intel and law enforcement buyers.
- Drove launches end to end with Product and R&D, from naming and messaging to talk track, release assets and rollout across channels.
- Built ongoing customer engagement programs: testimonials, surveys that evolved into published reports and localized field activities.
- Executed large-scale training events, including SKO for a 300+ person sales org, resulting in field and CS teams being equipped with sharp, persuasive stories and the domain expertise needed to win.
- Armed sales reps with the enablement they used to close deals: battlecards, objection handling, discovery guides, demo scripts, competitor analyses and pitch decks.
- Translated deep technical forensic capabilities into crisp, buyer-facing content for inbound and outbound motions.
